PROFESSIONAL SUMMARY

Full-stack MERN developer and B.Tech Computer Science student at NIST University with experience building scalable web applications, secure APIs, authentication systems, and analytics platforms. Skilled in Java, JavaScript, DSA, OOP, DBMS, SQL, debugging, REST APIs, problem solving, and full-stack development with strong interest in software engineering and backend optimization.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture

Database: MongoDB, Mongoose, Redis, DBMS

Core CS: Data Structures & Algorithms, OOP, Collections Framework, Operating Systems, Computer Networks **Tools:** Git, GitHub, Postman, Docker (Basics), Linux, VS Code

Concepts: API Security, Rate Limiting, Debugging, Team Collaboration, Async Programming

PROJECTS

Notification & Analytics Dashboard — Mini SaaS System | React, Node.js, Express, MongoDB, Redis, JWT

- Built an analytics dashboard aggregating events and notifications from 3+ backend services. Implemented
- role-based access control and protected admin routes using JWT authentication. Improved API performance
- by approximately 45% through Redis caching and rate limiting. Designed scalable backend APIs and
- optimized request handling for analytics data processing.

Real-Time Chat Application | React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT

- Developed a scalable real-time messaging platform supporting concurrent multi-user communication using WebSockets. Implemented
- secure JWT-based authentication with private and public chat room functionality.
- Reduced average message latency by approximately 35% through optimized socket event handling.
- Designed modular REST APIs following MVC architecture principles for maintainability and debugging.

E-Commerce Platform | React.js, Node.js, Express.js, MongoDB, JWT, Stripe API

- Built a full-stack e-commerce application with authentication, product management, cart functionality, and Stripe integration.
- Implemented role-based admin controls and secure API workflows using JWT authentication.
- Improved backend performance through modular API design, achieving response times below 400ms during testing.
- Tested application scalability using simulated concurrent users and optimized workflows using Postman and Git.

EDUCATION

NIST University, Berhampur

Bachelor of Technology (B.Tech) — Computer Science & Engineering | 2023 – 2027 | CGPA: 8.36/10.0

Ravenshaw Higher Secondary School, Cuttack

Intermediate (CHSE) | 2020 – 2022

ACHIEVEMENTS & PARTICIPATION

- Solved 200+ DSA problems across LeetCode and GeeksforGeeks.
- Built 4+ full-stack MVPs focused on scalability and backend optimization
- Designed backend systems handling 1,000+ API calls/day in development environments.
- Participated in Smart India Hackathon (SIH) 2025 by contributing to “FarmAssist,” a web and mobile-based farm biosecurity management platform focused on livestock health monitoring, vaccination tracking, compliance management, and multilingual accessibility.

CERTIFICATIONS

- Certification in Full Stack Web Development — NIST University
- Certification in Big Data Analytics — NIELIT, Patna
